Professional Summary

Software Development Engineer with 5 years of experience in enterprise software development, specializing in data governance, compliance, auditability, and cloud-enabled platforms. Skilled in Java, C, SQLite, API development, performance optimization, and backend feature development, with a strong focus on building reliable, scalable, and user-focused product solutions.

Experience

Job Title : Software Engineer II, *Company* : *Rocket Software* 08/2025 – Present
Product Name : IBM Db2 CI/CD Expert for z/OS Location : Pune, India

- Standardized strict-mode validation across **15+ APIs**, reducing validation-related defects by **30%** and improving consistency across backend services.
- Designed and implemented verbose reporting capabilities, improving system observability and reducing troubleshooting effort by 50%.
- Adopted Test-Driven Development (TDD) using JUnit and Mockito, achieving 80%+ automated test coverage and reducing regression defects by 35%.
- Winner of Rocket Software's AI Hackathon for developing an innovative AI-powered Pull Request (PR) Reviewer System.

Job Title : Software Engineer I, *Company* : *Veritas Technologies LLC* 06/2022 – 08/2025
Product Name : Veritas Data Insight Location : Pune, India

- **Email Notification Framework :** Developed a configurable email notification framework that automated alerts across **10+ governance workflows**, reducing manual monitoring effort by **60%**.
- **Audit Dashboard :** Built a custom audit dashboard capable of analyzing **50K+ audit events**, reducing investigation and compliance reporting time by **70%**.
- **Policy Management Framework :** Implemented policy validation and execution frameworks for governance enforcement across **thousands of monitored assets**, reducing manual compliance effort by **60%**.
- Designed asynchronous workflow jobs with retry and status-tracking mechanisms, achieving **99%+ execution reliability** and improving operational automation.
- Contributed to cloud modernization efforts for **Alta Data Insight**, enabling migration of enterprise governance capabilities from on-premises to cloud-native environments.
- Recognized for an award-winning innovation idea among the top entries in the Illumination Hackathon and awarded for outstanding cross-team collaboration and contributions beyond core responsibilities.
- Gained hands-on exposure to Python for scripting, data processing, and automation to support backend development and improve engineering productivity.

Job Title : Software Engineer Intern, *Company* : *Rakuten* 10/2021 – 05/2022
Location : Bangalore, India

- Managed Keycloak Identity and Access Management (IAM) across Sandbox, Staging, and Production environments.
- Collaborated with teams to ensure successful IAM integrations and smooth client operations.

Education

Bachelor of Technology (B.Tech.), *Walchand College of Engineering, Sangli* 06/2018 – 06/2022

- Computer Science Engineering
- CGPA 7.5

Skills

- **Languages:** Java, C, C++, Python, Golang
- **Backend:** Spring Boot, REST APIs, Microservices, JPA/Hibernate, Multithreading, Design Patterns, JSON Processing
- **Testing:** JUnit, Mockito, TDD, Unit Testing
- **Databases:** SQLite, MySQL, IBM Db2, Elasticsearch
- **Cloud & DevOps:** AWS, Docker, Kubernetes, CI/CD, Git, Linux, Maven, Kafka
- **Core Concepts:** OOP, SOLID Principles, Data Structures & Algorithms, Distributed Systems, Agile Development
- **AI Tools:** Github Copilot, Claude Code, Chatgpt
